It's Time To Better Your Business!

Join us for lunch and learn how to:

- Manage your entire purchasing & requisition process from start to finish
- Increase employee productivity by simplifying your expense & reimbursement process

Pain #1: Simply recording the purchasing transaction is not enough for your business.

Your Solution: The **WorkPlace eProcurement** suite of products. These allow for web based Requisition Entry, Approval Routing, Review and Invoice Matching is fully integrated with Microsoft Dynamics GP and has numerous additional modules which will allow for a complete and integrated eProcurement solution.

Pain #2: Managing your employee's expenses is heavily paper based and loaded with redundant data entry prone to error.

Your Solution: The **WorkPlace Expense** module. This empowers employees to submit their own requests for expense reimbursement from virtually any Windows based computer with an internet connection. It can be interfaced with Dynamics GP Project Series and include Project related fields on each line item or it can be connected directly to Dynamics GP Accounts Payable.

Most adopters of eProcurement realize an ROI of 126% to 300% within the first year of deployment!

***Attend and receive a 10% discount off software and named user pricing!**

Discount only available for attendees who acquire any of the WorkPlace eProcurement Suite or WorkPlace Expense modules by August 31, 2009. Standard Enhancement Fees apply.
