Paramount Technologies Unveils Enhanced eProcurement for Microsoft Dynamics GP

Release 10.5 Tightens Microsoft Integration and Incorporates
Enterprise-Class Interface and Multi-Lingual Support

Walled Lake, Michigan, September 17, 2008 — Paramount Technologies, the leading provider of middle-market Employee Workforce Automation solutions, today announced the immediate availability of a major release of their popular WorkPlace eProcurement solution. Release 10.5 of WorkPlace eProcurement for Microsoft Dynamics GP adds comprehensive Multi-Lingual support, reducing supplier communication errors and facilitating cross-border requisitioning. Microsoft platform compatibility is deepened with support for Microsoft Vista, Windows Server 2008 and SQL Server 2008. The user interface is refined, with features such as an easy-to-view dashboard with activity indicators typically associated with Enterprise-class solutions. WorkPlace eProcurement for Microsoft Dynamics GP is designed specifically for and is fully integrated with Microsoft Dynamics GP, creating 100%-compliant Microsoft Dynamics GP transactions in real-time.

"We needed a GP-based solution that could accommodate our business model. We operate in over 15 countries and have a very diverse set of users. The ability for them to requisition in their native language with an eProcurement product localized for them is invaluable," said George Mason, the procurement executive for an international building materials company. "Workplace eProcurement has enabled us to dramatically reduce errors and streamline our procurement processes worldwide."

"In today's global economy, companies need the ability to easily source cross-border to identify and take advantage of maximum procurement savings," said Salim Khalife, Chairman and CEO, Paramount Technologies. "WorkPlace eProcurement for Microsoft Dynamics GP gives Dynamics GP customers the ability to do this easily."

About Paramount Technologies

Paramount Technologies is the leading global provider of web-enabled Employee Workforce Automation solutions delivering reduced transaction costs and enhanced process efficiencies to middle-market and enterprise organizations through the automation of procurement, requisition, project, time and expense transactions. The Paramount WorkPlace Suite is built from the ground up for interoperability across heterogeneous environments using open standards and integrates with all major ERP systems.

Established in April 1995 and profitable every year since, Paramount is a private company with headquarters in Walled Lake, MI and offices in Atlanta, GA and Jacksonville, FL.

All trademarks or registered trademarks are property of their respective owners.
